FROM THE DIRECTOR

**O**n a recent Saturday morning I was working in the school office and minding the Messler Gallery when a couple came up the walkway, the man holding the woman's elbow with one hand and grasping an extendible white cane in the other.

*He was quiet and friendly, with a salt and pepper mustache, and it quickly became clear that he was also an avid woodworker. I, of course, gave way to curiosity and learned, among other things, that he has been blind since his early 20s, has a Braille rule for measuring, uses a table saw and other power tools, and makes lots of special jigs. He proudly showed me his hands, with all ten digits intact. He spent an hour and more raptly*

*"looking" at every piece of furniture in the Faculty Show with those same hands, after which they toured the workshops.*

*Trying to imagine myself into his universe, I am simply blown away by the quality of concentration it must take to do fine woodworking without sight — to use power tools safely, to make joints fit well, to move lumber around the shop...everything! But even more, I marvel at the human will. What is the reward that calls forth such effort?*

*As every student in Basic Woodworking quickly realizes, a well-cut dovetail is much more than two pieces of interlocking wood: it is the summation of a process that elicits discipline, integrity, skill, and perseverance. Moment by moment, designing and building furniture is as rooted in the ordinary physical world as mowing the lawn or washing the dishes, yet it is also an act of will by which we forge order and meaning in our lives. What motivates a blind woodworker is surely what motivates all of us: the pleasure and fulfillment that come with the act of making.*

MEET THE FELLOWS

Last December the Center's Studio Fellowship Program kicked into gear with the opening of the new Jackson Building. The program provides free studio space to emerging and established woodworkers for anywhere from a month to a year. In return, they commit to full-time exploration of new work, pushing themselves forward artistically, expanding their technical skills, and laying the groundwork for the next stages of their careers.

Current Studio Fellows are:

**LIBBY SCHRUM**, 27, Georgetown, Texas. Libby earned an MFA in Furniture Design at the Rhode Island School of Design this past June. Her long-term goal is to build furniture on commission in her own studio, supplemented by limited-production work. She is drawn to the client relationship: "I enjoy figuring out what someone wants and working with them to make it happen." During her year at the Center, Libby is working to develop a personal voice in furniture design that will find a reasonably broad audience. She also plans to explore the production and marketing of a line of wooden pet products, with particular attention to the challenge of meeting price points.

**MARYAH SMITH-OVERMAN**, 24, Asheville, North Carolina. Maryah earned a BFA from the University of North Carolina and subsequently completed an Associates Degree in Professional Crafts-Woodworking at Haywood Community College in Clyde, North Carolina. She is in the Fellowship Program for three months to continue learning from different resources, to build skills, and to augment her body of work. With her fine arts background, she tries to integrate color, texture, and/or movement in every piece. "That's the challenge that keeps it exciting." She would eventually like to be self-employed as a studio furniture maker, but plans to do whatever it takes to stay in woodworking.

## CENTER for FURNITURE CRAFTSMANSHIP

is a nonprofit 501(c)(3)  
educational organization.

Our mission is to provide the best possible  
education for people who want to design  
and build functional, beautiful, expressive  
work out of wood to the highest  
standard of craftsmanship.

## MEET THE FELLOWS (continued)

**KRISTIN TERPENING**, 45, Austin, Texas.

Kristin is a former wildlife biologist who completed our Twelve-week Intensive in May 2004, after several years of local courses in Texas. She

originally came to the Center to "enhance my skills as a maker and build traditionally styled furniture," but now wants to "explore the art side of woodworking." Kristin's thrust for her one-year Fellowship is to expose herself to the many approaches to woodworking available in this rich environment, and she has already been able to participate in courses in marquetry, turning, carving, drawing and furniture design. Looking ahead, Kristin's goal is to be self-employed as a studio furniture maker doing one-off pieces, and to have several designs she markets as multiples.

**AKIKO YOKOYAMA**, 37, Japan.

A former International Human Resources Manager for Coca-Cola, Akiko completed our Nine-month Comprehensive last June and stayed on for a one-year Fellowship. She is currently working on a series of conceptual form studies and investigating their translation into furniture. For Akiko, the Fellowship is an opportunity to explore furniture design as a viable alternative career and she is weighing the options of going to graduate school for design, finding a niche as a self-employed maker, or returning to the corporate world. Her steady goal is to continue creative woodworking in a way that keeps it enjoyable and meaningful.

## 2005 GRADUATES: WHAT THEY'RE DOING NOW

*The graduates of our first Nine-month Comprehensive were set loose upon an unsuspecting world in early June. Here's what they are up to:*

**ORION BOSHES** is working at Phi Home Design in Rockport, Maine, a high-end cabinet and furniture shop. ■ **ANDREW BRADFORD** is setting up shop in a rented three-car garage in Sandy Point, Maine. Commissions include a quartersawn oak dining table in the Arts & Crafts style, a bed, and several coffee tables and end tables, all for a regional clientele. ■ **BROTHER CHRISTOPHER FAIR OSB** is managing the woodshop at St. John's Abbey in Colledgeville, Minnesota. Since returning in June he has re-designed the shop layout and he is currently designing furniture for 30 guest rooms at the Abbey, among other projects. ■ **MIKE FINK** has set up shop in a rented garage in Denver and is booked with five months or more of work that has come through word of mouth from the surrounding community. He has orders for coffee tables, a bedroom set, an armoire, and a dining room table, among other things. ■ **JESS HAGEY** is the furniture maker for Bogenrief Studios, a stained glass artwork company in Sutherland, Iowa. His responsibilities include making frames and developing furniture designs to expand the company's product line. ■ **BLAIR HAWLEY** has taken a position as plant manager for the Hitchcock Chair Company in New Hartford, Connecticut. His areas of responsibility include Manufacturing, Design Engineering, Quality Control, Graphic Arts, Purchasing, Planning and Distribution. ■ **JASON HUBER** is employed at the Denver Center for Woodworking in Littleton, Colorado which primarily handles custom millwork. ■ **CLARK KELLOGG** has launched Kellogg Furniture Design, LLC in Houston, Texas, is displaying his work at the Houston Center for Contemporary Craft, and is working on several furniture commissions. ■ **DAN PARKINGTON** is working in a high-end cabinet/furniture shop called JG Woodsmiths in Fairfield, New Jersey. Their web site is [www.jgwoodsmiths.com](http://www.jgwoodsmiths.com) ■ **FRED STEHMAN** is launching his own company, Fred Stehman Furniture Studio, in Lancaster, Pennsylvania and is filling in as necessary with work for a painting contractor. ■ **LESLIE WEBB** has enrolled in the three-year Crafts & Design program at Sheridan College in Toronto. ■ **AKIKO YOKOYAMA** is participating in our Studio Fellowship Program for one year.

## CENTER JOINS FORCES WITH UNIVERSITY OF MAINE

The University of Maine at Orono has signed an agreement to make the Center's Twelve-week Intensive an elective for students in its undergraduate Wood Science and Technology Program. The focus of the University's program is to prepare students for careers in wood technology, ranging from working as wood craftsmen to becoming professionals in the field of Material Science and Engineering.

Credit for the initiative goes to Barry Goodell, Ph.D., Professor and Head of UMaine's Wood Science and Technology program and one of the faculty founders of UMaine's Advanced Engineered Wood Composites Center (AEWC). "The Center for Furniture Craftsmanship offers one of the finest programs for this type of study in the world and it's a natural fit with our Wood Design and Craftsmanship elective curriculum," says Goodell.

UMaine offers a 4-year accredited degree in the Wood Science and Technology field and is an international leader in research and the study of wood and wood products. Their world-class facilities provide students with opportunities to work with advanced technologies and the AEWC hires over 100 students each year to work on a variety of wood-related research projects.

For more information on the University's program, visit: [www.wood-science.umaine.edu](http://www.wood-science.umaine.edu)
