

Manufacturer of Architectural Woodwork Seeking Cabinets Makers / Woodworkers and Finishers

Littleton Millwork established in 1967 is a full-service Architectural Millwork Company. We work throughout New England on some of the highest quality residences.

Located in the heart of the White Mountains, the area offers an outdoor lifestyle within 2 ½ hours to Portland, Maine: Burlington, VT and Boston, MA.

We are looking for Experienced and Non-Experienced dedicated employees.

For the Non-Experienced Littleton Millwork has an apprenticeship program where we start them in our milling department learning the material, reading, and associating shop drawings with cutting bills, basic machinery to be able to square any size lumber and process this to its intended size. They learn the laminating process and how to re-saw lumber into veneer. From there we introduce them to the joinery process pending our production schedule which includes historic windows and doors, cabinets, stair work, furniture, or any architectural element.

For the Experienced we are looking for dedicated thinking people who can be team players but also work well unassisted. Knowledge of woodworking and cabinetmaking, able to read and interpret drawings is a must.

All positions offer benefit packages for full time employees.

Pay depending on experience.
