WE'RE HIRING a skilled wood craftsperson. Is that you? Our small studio located in the Columbia River Gorge in the Pacific NW is called PHLOEM STUDIO: you can see what we do at phloemstudio.com and casestudycabinets.com. We're looking for full time (32 to 40 hours a week) craftsperson who has worked in a high-end custom wood fabrication shop for 3 to 5 years, but we're willing to train the right person. The qualified candidate will have a sharp eye for detail and great time management skills. In this position you will be building heirloom quality furniture and high-end custom cabinetry and millwork. You will be required to read drawings, formulate cut lists, organize projects, work well with other nice humans, and work independently towards the shared studio goal of creating awesome objects and experiences in the lived environment that we as a collective can be proud of. We're a small shop: we only hire folks with an open mind, a positive attitude and excellent communication skills. HUSTLE is a MUST (working efficiently AND knowing when to slow down and focus). A sense of humor is a plus. We're proud of what we do here. If you'd like to apply, please send a resume and your desired hourly wage to questions@phloemstudio.com. We offer benefits after 90 days including health care and PTO. Covid is real, science is real, this is a vaccinated shop, that's the vibe.
