Looking for **Cabinet Maker/Mill Worker**

Phi Builders and Architects is a design/build company with about 35 employees located just down the road on route 90. Our cabinet shop is looking to add another woodworker at any level of experience with a passion for quality and an interest in developing a mastery in joinery and fine woodworking.

We do a range of work from high quality built-ins, to kitchens, historic windows and doors, furniture and architectural mill work. Our shop has up to date machinery and tooling but we also use hand tools regularly.

We would be looking to hire someone who is invested in making a career of quality woodwork. Phi provides competitive pay and benefits and a friendly team environment.

Please contact Marc Paulsen (Shop Manager) for more information and a tour of our facility.
